

Handcrafted Projects

Handcrafted Projects aims to empower those who have been disadvantaged or faced social exclusion due to crime, alcohol or substance abuse, poor mental or physical health, unemployment, or having experienced abuse or been in the care system.

CHALLENGE

The North-East continues to have one of the highest levels of disadvantage and deprivation. Local communities often lack facilities and resources, and local people have less confidence and opportunities.

SOLUTION

The social investment enabled them to purchase two new buildings. Now, with 70 houses, this growth is helping even more people find safe housing and comprehensive support.

REVENUE

It brings in revenue from various sources: housing benefits, rental income, adult learning contracts, grant income and trading.

IMPACT

By increasing the number of homes, more people at risk of homelessness, abuse, and social isolation will have access to safe housing and the holistic support they need to rebuild their lives.
